1. License installation steps

Installation of ODDI for SAP requires the following steps to be completed in the order listed below.

1. Get the license key file from your support team or contact:
   support@ecoservity.com
2. Import the license tool using the code provided.
3. Place the license key file on an AL11 directory & ensure that the same is readable from the SAP system where license is being setup.
   - a   Note: license file is generated for each SAP system ID, as detailed in the Help documentation here.
4. Using SAPGUI, login and go to transaction code: /ECOS/ALM_INST
5. Following screen is presented, where entries for your SAP system are needed:

6. Once entries are done, execute or press F8

7. Upon successful execution, the license is loaded in the SAP system:
8. Congratulations, you are ready to use ODDI
